

MT900 Fume Extractor

Extracts fume & dust at source & expels cleaned air to work area

Built-in spark arrestor

Choice of filters, standard or high efficiency

Fantail capture nozzle with magnet to hold in place, MIG torch attachment or use with Extractor MIG torch

Bye pass motors - cooling air is separate from suction from fume source

Built-in filter full indicator - senses pressure in front & behind the main filter cartridge

Carry around, portable machines - needs only a power point

115 or 230/240 volt 50 or 60 hz available

	MT800ni	MT900ni
Dimensions	790 x 255 x 400mm	790 x 255 x 400mm
Weight	19 kg	22 kg
Motor(s)	1100 watt	2 x 1100 watt
Hose supplied as standard	3.75m x 45mm dia.	3.75m x 65mm dia.
Airflow with standard hose	195 m3/hour @ 400mm WG	390 m3/hour @ 400mm WG
Filter efficiency (standard filter pt. no. 1009)	99% to 10 um	99% to 10 um
Filter efficiency (high efficiency pt. no. 1010)	99.996% to BS 3928	99.996% to BS 3928
Capture nozzle with magnet	pt. no. 1028	pt. no. 2028
